LITE

DV823

Lite è il sistema operativo pensato per rispondere alle nuove esigenze del lavoro, con soluzioni flessibili ed ergonomiche che favoriscono benessere, interazione e comfort. Il design minimale e la scelta di materiali riciclati e riciclabili rendono ogni configurazione leggera ma solida, adattabile a contesti versatili e contemporanei quali open space, aree meeting e spazi informali. Due tipologie di gamba metallica – a U aperta o a O chiusa – si combinano a scrivanie, bench, tavoli riunione e tavoli alti, componendo una collezione completa e armoniosa. Grande attenzione è riservata al comfort visivo e acustico, grazie a diverse soluzioni di screen: in feltro fonoassorbente, melaminico, in termoformato o in polistirene rivestito in tessuto, e modesty panel in melaminico o feltro. La gestione intelligente del cablaggio e la modularità delle soluzioni rendono Lite ideale per ambienti dinamici, in continua evoluzione.

Lite is the operating system designed to meet the evolving demands of today's workplace, offering flexible and ergonomic solutions that enhance well-being, interaction, and comfort. With its minimalist design and the use of recycled and recyclable materials, every configuration is lightweight yet sturdy—perfectly suited for versatile, modern environments such as open-plan offices, meeting areas, and informal spaces. Two styles of metal legs—open U-shape or closed O-shape—can be paired with desks, benches, meeting tables, and high tables, creating a cohesive and comprehensive collection. Great attention is given to both visual and acoustic comfort, with a range of screen options available: sound-absorbing felt, melamine, thermoformed materials, or fabric-covered polystyrene, as well as modesty panels in melamine or felt. Smart cable management and modular configurations make Lite the ideal solution for dynamic, ever-evolving workspaces.

Lite est le système d'aménagement conçu pour répondre aux nouvelles exigences du travail, avec des solutions flexibles et ergonomiques favorisant le bien-être, l'interaction et le confort. Son design minimaliste et le choix de matériaux recyclés et recyclables rendent chaque configuration légère mais solide, adaptable à des environnements contemporains et polyvalents tels que les open spaces, les zones de réunion ou les espaces informels. Deux types de pieds métalliques – en forme de U ouvert ou de O fermé – peuvent être associés à des bureaux, benches, tables de réunion ou tables hautes, composant une collection complète et harmonieuse. Un soin particulier est apporté au confort visuel et acoustique, grâce à différentes solutions de cloisons : en feutre acoustique, en mélaminé, en matériau thermoformé ou en polystyrène recouvert de tissu, et des modesty panels en mélaminé ou en feutre. La gestion intelligente du câblage et la modularité des solutions font de Lite un choix idéal pour des environnements dynamiques, en constante évolution.
